Text Responses

What aspects of the course contributed most to your learning? Please be as specific as possible.

I enjoyed learning how Kenny thinks about philosophy. He is an exemplary professor and a seems to be a very upstanding man. He was able to explain concepts in an easy to understand way and always corrected a student in a light manner. I enjoyed his class and being in his presence. Thank you for a wonderful semester.

I had never been challenged like this in my entire academic history before this course. Dr. Shields introduced to me some of the most mind bending concepts in a way that didn't destroy my brain cells! I really did enjoy the content and although some of the reading assigned to us was... long, it really was a subject that I loved discussing and I really will miss our in class discussions.

INTERACTION- the class lecture/discussions are how I learn best and it was a very fun class that I enjoyed immensely.

Not much. I was confused most of the time.

The various amounts perspectives the professor gave to us

Discussions

I liked that we can talk in class if we want to but that there is no pressure if you don't.

The lectures in class contributed most to my learning, as well as the fun group activities. It really made me think critically.

I think being able to say anything in a safe environment

Kenny. Kenny is freaking amazing. He is the most human-centric communicator I have ever had as a professor. It's as if he lives to be a stress reliever for students - empathetic and kind. Give Kenny all the raises, I write to no one in particular. Note: Kenny is the ONLY professor I had take ANY measure to help students during the pandemic. He changed the syllabus continually to aid us in passing the course. THIS IS HOW IT'S SUPPOSED TO BE.

Boring

N/A

The reading assignments taught me strong time management skills because you never knew how long they would be so you needed to get them done accordingly.

What suggestions do you have to improve this class?

None

There needs to be more explanation for the students who are not philosophy majors because a lot of it was fast-paced and did not leave room for the confused.

None

Already good

No more than two readings a week, because it becomes a burden after two readings with twenty pages each

I have no suggestions, the class functioned just fine.

This class was amazing

there are 4 assignments due a week (quiz, forum, responses, reading notes). This is a lot when a student is taking a lot of credit hours. I don't know if it is a lot otherwise, but consider maybe 2-3 assignments instead.

To many long boring reading

N/A

More group work

I have no suggestions. I think philosophy is the kind of subject that's hard to teach from a distance, so I did fall away from it for a bit, but when we were in class, our discussions really did intrigue me.

I sometimes felt that the reading notes took a long time. I understand that you wanted to ensure that students were reading as you assigned.
